

POWER SAVING HOURS

Power Saving Hours

Power down from 4pm–8pm!

Saving energy is something we should think about every day, but especially during the coldest days of the year.

You can help reduce energy demand during peak usage times from 4-8PM by:

- Refraining from clothes washer/dryer and dishwasher use
- Turning off computers and other home electronics
- Turning off lights in unoccupied rooms
- Turning on outdoor and /or holiday lights after 7PM
- Turning down thermostats one to three degrees

POWER SAVING HOURS
Power down from 4pm–8pm!
